

## Laser Lipo, Fat Freeze, Cavitation and Radio Frequency Treatments

### **Laser Lipo – *What is it?***

The Lipo Laser Utilises the latest low level/cold laser technology to reduce the girth and fat over almost all areas of the body without surgery, downtime or redness. A typical 40-minute waistline treatment can reduce an individual by  $\frac{1}{2}$  to  $\frac{3}{4}$  of an inch, while a full protocol of eight treatments usually results in multiple inch loss.
